:: About Us

JABA IT Ltd. began operations on **12 July 2004** through a collaboration between **ITA Inc., Japan**, and **Managing Director of JABA IT**.

The company obtained its trade licence in **2008** and was incorporated in Bangladesh in **June 2011** as a limited company (Registration No. C-93625/11).

JABA IT is a member of the Bangladesh Association of Software and Information Services (**BASIS**), Membership ID: **GE-10-12-415**.

Supported by experienced professionals and strong international partnerships, particularly in **Japan**, JABA IT provides reliable software development, system integration and customized IT solutions to clients across diverse industries and markets.

Project Profile

Some Focused Projects

Japan-Based Custom Software Projects

(Medical Prescription Management System)

4

Project Summary

- Patient & Prescription Records
- Medicine & Dosage Management
- Prescription History Tracking
- Clinic Workflow Integration
- Secure Role-Based Access
- Different types of Insurance
- Patient wise Customized Dosage and Nursing Management

A Centralized prescription management for accurate, secure and efficient clinical operations.

Language & Database: React, Node.js, and PostgreSQL

Japan-Based Custom Software Projects

(Health Check & Clinic Board Analytics System)

5

Project Summary

- Health Check Data Management
- Medical Result Visualization
- Clinic Board Reporting
- Trend & Comparative Analytics
- Management Dashboards

An analytics platform for monitoring health-check results and supporting clinic-level decisions.

Language & Database: React, Python, TypeScript, and PostgreSQL

Japan-Based Custom Software Projects

(Budget Management System)

6

Project Summary

- Budget Planning & Allocation
- Department-wise Budget Control
- Expense & Variance Tracking
- Approval Workflow
- Financial Reports & Analytics

A centralized solution for budget planning, control, monitoring and management reporting.

Language & Database: ASP.NET Core MVC with C# and Microsoft SQL Server

Japan-Based Custom Software Projects

(Online Bus Ticket Management System)

7

Project Summary

- API Create & Integration
- Day Pass, Monthly Pass
- Route Management
- Package management
- Order Management
- Member Management
- Batch Processing for Bus Ride
- Payment

Language & Database: ASP.NET with C# and Microsoft SQL Server

Online Schedule & Lesson Management System

8

Project Summary

- Online schedule management
- Registration management
- Profile management
- Lesson Timetable management
- Lesson booking management
- Curriculum management
- Lecturer management
- Lesson recording
- Lesson history management
- Payment management
- Student dashboard
- Teacher dashboard

Language & Database: PHP(Customized Framework), MySQL

Online Bidding System

9

Project Summary

- Auction planning
- Billing, Reporting
- Market research
- Pre-request, my request, like
- Payment module
- Bid management
- Decision policy management
- Customer management
- Inventory control
- Sales management

Language & Database: PHP(Customized Framework), MySQL

Online Production Management System

(food manufacturing company)

10

Project Summary

- Employee management
- Warehouse management
- Inventory management
- Requisition management
- Sales promotion management
- Team and attendance management
- Production management
- Batch processing
- Supplier management
- Customer management
- Reports

Language & Database: C# ASP.Net, MS SQL

Online ERP system

(Real Estate Industry)

11

Project Summary

- Front office management
- Project management
- Sales management
- Inventory management
- Customer management
- Human resource management

Language & Database: JAVA, Oracle

Online School Management System

12

Project Summary

- Front Office Management
- Online Admission Management
- Student Data Management
- Student Fees Book Management
- Student Payment System (Cash, Bank, Online, Card, bKash)
- Parent Data Management
- Authority, Teacher & Employee Database
- Attendance Management
- Exam & Result Processing Management
- Assignment & Routine Management
- SMS for Attendance, Group Notice
- Auto SMS/Email for Birthday Wish, Payment Notice in Advance
- Library Management (Built in)
- Transport
- Accounting Module (Built in)
- Payroll Software (Integrated with)
- Inventory Management Software (Integrated with)
- Website Development with Admin Panel for Contents Management
- Admin Dashboard
- Student Dashboard
- User Role and Permission

Language & Database: PHP(Laravel), MySQL

Online Learning Management System(LMS)

13

Project Summary

- Course, Subject & Curriculum Management
- Lesson & Digital Content Management
- Teacher, Student & Class Management
- Assignments & Online Examinations
- Multiple Question Types & Question Bank
- AI-Assisted Question Generation
- Self-Practice & Mock Tests
- Automated Marking, Grading & Results
- Performance Analytics & Progress Tracking
- Role-Based Dashboards & Access Control
- Attendance, Routine & Notifications
- ERP & Academic Module Integration

Language & Database: PHP(Laravel), MySQL

Site scrapping & mailing system

14

Project Summary

- Admin dashboard
- Member dashboard
- Member registration
- Member Management
- Multi admin Management
- End client's registration by member
- Service package management
- Email template management
- Scrapped information management
- End client's business domain and scrapping data matching
- Auto & manual email delivery to end client with matched information
- Payment system

Language & Database: PHP(Cake PHP), MySQL

Online B2B, B2C portal

15

Project Summary

- Overview
- Online business directory
- Bargain sale
- Sales management
- Online shopping cart
- Payment management
- Admin dashboard
- Client dashboard

Language & Database: PHP(Customized Framework), MySQL

Online Requisition & Service Management

16

Project Summary

- Company organogram management
- Master setting
- Employee info from HRM system through API
- Ticket submit (Claim prepare & submit)
- Ticket status, priority & handling
- User role & permission
- Vendor
- Expense and work
- Work approval or reject by the Ticket Submitting person
- Reports

Language & Database: PHP(Laravel), MySQL

Online Human Resources Management System

17

Project Summary

- Summary
- Online recruitment management
- Personal data Sheet
- Govt. pay scale management
- Promotion management
- Transfer management
- Evaluation/Award management
- Punishment management
- PRL (Post Retirement Leave) management
- Document management
- Crystal Report

Language & Database: C# ASP.Net, MS SQL

Warehouse management system, EC site

18

Project Summary

- Ware house type & setting
- Product & stock management
- B2b & b2c based order management
- Supplier & client management
- Shipment & inventory management
- Delivery rout tracing
- Web & Mobile Application

Language & Database: PHP(Laravel) MySQL

Account Software

(Desk Top Based)

19

Project Summary

- Chart of Accounts
- Voucher management
- Accounts Receivable
- Accounts Payable
- Revenue & Expense
- Cash book
- Bank book
- Trial Balance
- Balance Sheet
- General Ledger

Language & Database: C# .Net, MS SQL

Payroll Software

(Desk Top Based)

20

Project Summary

- Master setting
- Employee data management
- Basic Salary, allowance, tax, bonus setting & management
- Provident fund management
- Loan management
- Attendance management
- Pay slip, and other statement
- Pay slip broadcast on SMS & email
- Various reports
- Data import, export
- API integration with Accouting software

Language & Database: C# .Net, MS SQL

Training management system

(For Doctors)

21

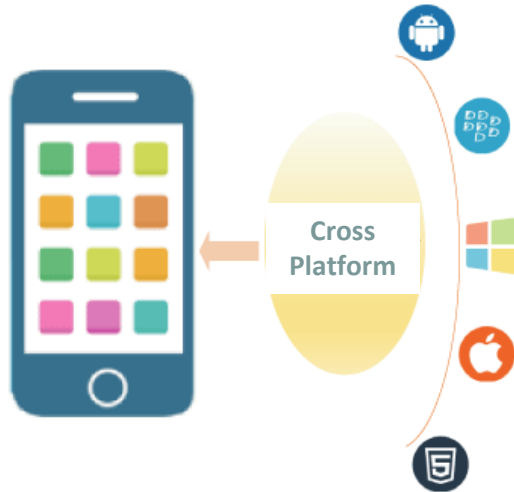

Project Summary

- Personal profile
- Course management
- Training schedule
- Different Packages
- Payments
- Report

Language & Database: C# .Net, MS SQL

Mobile Applications

22

- Development Platform
 - React Native & JavaScript
 - Objective C

BIG DATA Management & AI (Research & Development)

23

- Car Detection : Different types of car detection & Report Generation.
> Development Platform: Python & AI
- Human Face detection: Patients' face recognition, data retrieve from history and link with accurate doctors as per the patient's symptoms.
> Development Platform: Python & AI
- E-Commerce:
> Development Platform: Python Django, node js.
- Web data analytics System.
> Development Platform: Python

Thank You!
